

# EMERGENCY PROCEDURE FOR A PROPANE LEAK:

*If you smell gas in your house, workplace, vehicle or around any gas equipment or appliance, follow the emergency procedure below.*

Step	Action:
1	<p>Extinguish all smoking material and other open flames.</p> <p>Do <b>NOT</b> operate electric switches. Do <b>NOT</b> light matches. Do <b>NOT</b> use your phone.</p> <p>Any spark in the area where propane gas is present may ignite the gas. This could include the spark of a light switch, telephone, fan or refrigerator motor – even static electricity from walking across a room.</p>
2	<p><b>IMMEDIATELY</b> get everyone out of the building, vehicle, trailer or area.</p>
3	<p>Close all gas tank or cylinder supply valves.</p> 
4	<p>Use your neighbor's phone to call a trained professional service person and the fire department.</p> <p>Do <b>NOT</b> re-enter the building, vehicle, trailer or area until a service person advises it is safe to return.</p> <p>Do <b>NOT</b> turn on the gas.</p>
5	<p>Let the trained propane service person and firefighters check for escaped gas. Have them air out the area before you return.</p>
6	<p>Have the trained propane service person</p> <ul style="list-style-type: none"><li>• repair the leak</li><li>• turn on the gas</li><li>• check all the gas appliances and</li><li>• re-light the pilots on the appliances</li></ul>
7	<p>Re-enter the area <b>ONLY</b> when the service person and firefighters say it's safe.</p>
